

## Inside This Issue:

Tom Murphy combines wood and Resin. P 1-2. ▷

▷ Wednesday demo - P3.

▷ Annual Family Day in Blessington - P4.

▷ Schedule of Trade Stands - P5.

## Upcoming Events:

- Next Dublin Chapter Meeting - 6th August 2016.

- National Seminar - 22/23 Oct - Maynooth.

success of the process is the elimination of bubbles. In this regard, one of Tom's most recent acquisitions is a pressure-pot (rather like a plastic lidded bucket with integral clamps around the lid). Accuracy of measurement of amounts is crucial. The mixture needs to be stirred gently for quite a long time. Resin can also be layered to create dramatic effects. Caution: resin is extremely sticky; always wear light plastic gloves

### Turning a resin pen blank

Tom now mounts two pre-made pen blanks on the lathe-mandril. He uses a carbide tipped tool for initial rounding, changing to a gouge for final profiling (Brilliant idea! He has an LED bike-light attached to the brow of his face mask!). As a finish he prefers superglue. Another caution: protect your lungs! Resin is a very volatile substance. Never try to work it while it is still curing. He would allow about twenty four hours for this.

### A resin-and-metal bangle

Tom turns out the most stunning bangles and rings. In fact he won the beginners' competition at the 2015 National Seminar with just such a wonderful combination. He purchases two-part metal bangle-bases which, when pressed together provide on the outside, a channel of rectangular section which he then fills with a resin-mix of choice.

### Airbrushing

Tom has brought along his compact air compressor, complete with airbrushing head, itself quite a sensitive piece of kit. Essentially, you need to create a stencil on some frisket film (which comes in a roll, much like 'Contact'). Depending on the

### Wood and Resin - Tom Murphy adds some sparkle!

In June Tom Murphy (East Central Chapter) gave a great demo related to using resin with wood. He also covered aspects or airbrushing.

It is obvious from the outset that our demonstrator takes delight in working with resin as a major part of his woodturning. He uses Araldite epoxy resin in the proportion of two parts resin to one part hardener. Once set, it can be treated much like wood.

### Making a resin pen blank

He mixes up a batch of the resin which he pours very slowly into a flexible mould. When the mixture is partly set, he inserts chopped up bits and pieces of various items such as cones, seeds, gumballs etc. He also uses inks for colour-effects. Tom emphasises the 'endless possibilities' of such items, even watch

complexity of the desired image, cutting the shape of the desired form can involve some sophisticated hi-tech equipment, though a suitable scissors and a 'good' eye can achieve a lot. Tom decides to create the image of a blue butterfly on the side of a small bowl. The inks he uses are Daler Rowney acrylic. The film is applied to the bowl with the cut image in the desired position. Everything to do with today's demonstration involves a major degree of patience and meticulous accuracy. So, he is seated for the airbrushing process. He carries out many test sprays to achieve the optimum balance of colour and diffuseness of the spray before approaching the actual piece. The spray is extremely light, involving many short passes. He introduces a tiny amount of a different blue to create a darker tone, defining the edge of the image. He then very carefully removes the surrounding film using a craft knife. He now changes to a black ink, and with the apparent

ease which consummate skill always produces, he creates an absolutely stunning 3D effect as if the butterfly were away from the surface of the bowl!

So there you have it. These few lines can only serve to provide a simple overview of what was a most entertaining, good humoured and informative demonstration. Many thanks Tom, we'll not forget your visit for many a day!

Pacelli O'Rourke

(Note: If you wish to acquire details of where Tom buys his supplies you can contact him online at [tom@boards.ie](mailto:tom@boards.ie))

The demo on Saturday in JULY will be given by Kristian Doherty. He has provided a description of the "Cube within a Cube" that he will make, and that description accompanies this Newsletter.

**So, the UK has voted in the Brexit Referendum.**

If this spurs other EU countries into similar campaigns they might be known as follows: -

Portugo, Grexodus, Czechout, Swedone, Denpart, Italeave.  
You can probably think of others.

If they do not want out, then there is always Remania.

## Wednesday Meeting in June - 2 for the Price of 1.

The Wednesday meeting in June produced a demo from Willie Reville with guest appearance from J. Doran, Willie showed us how to use banksia nut to make attractive bird boxes. John, resident in a distinctive T-Shirt, produced a pen from a well-used camán (hurly). The following pictures were provided by Hugh Flynn.

## Burgers in the Rain - The Annual Family Day in Blessington.

The annual Family Day, hosted in Blessington by the Doran family took place on 18th June. The weather was not too kind, but 21 people, young and older, turned out for an enjoyable afternoon of food, drink and demos. The "master of the skew" Peter Mulvaney, gave the benefit of his experience, and a few stories thrown in as well, in making various proportioned beads and coves followed by a very tall tea-light holder.

Later in the afternoon, and after a few barbequed items (care of Stephen Coffey) everyone reconvened to watch Rich Varney make one of his pocket watches from cocobolo. A few pictures of the day.

## Demonstrators 2016

### Saturday

July - Kristian Doherty  
August - Francis Corr  
September - Pat Walsh  
October - Charlie Ryan  
November - tbc (AGM)  
December - Joe O'Neill

### Wednesday

July - Pat Walsh  
August - Sean McMorrow  
September - Tony Hartney  
October - Vincent Whelan  
November - J. Wigham  
December - Joe O'Neill

#### Trade Stands at the Saturday Meetings for remainder of 2016.

Apr. The woodshed	Sept The Carpentry Store
May. The Carpentry Store and The Hut.	Oct. The Hut
Jun. The Carpentry Store	Nov. The Woodshed
Jul. The Hut	Dec. The Hut
Aug. The Woodshed	Jan. The Woodshed

## June Competition Entrants

Advanced - camouflage!

Artistic - A statue in France is created by Bruno Catalano.

Experienced - An unusual tunnel in California's Sequoia National Park.

Beginners - Trees in the Hoia Forest in Cluj County, Romania.

*Note: There were no pictures of competition entries available for June.*
